

**Proposal to the CDMA for Funding:
Item: Insuring the Valencia Shared Streets Program**

1. What it's going to do? This money will allow us to insure the Valencia Shared Streets program in case anyone gets hurt, injured, or is there is an accident in and around the closure.
2. Who will it benefit? The entire community both residential and commercial given the necessity of keeping the closure safe. The entire community uses and enjoys the closure so we need to keep them in mind.
3. Who's going to do it, be in charge? Jonathan Plotzker Kelly is responsible for being point of contact on this piece. He is on the VCMA board
4. How much is it going to cost? \$3,556
5. Schedule, implementation? Immediately.
6. Demonstrate the community benefit: Given the unique nature of the Valencia Shared Streets program and how active the corridor is with both vehicular, bike, and other forms of traffic it's essential that the VCMA, Merchants, and the City of SF be insured against any potential accident. This will allow that to happen!
7. Partnership (supervisor, matching, etc.): There is no matching funds for this.
